

CHECK YOUR TECH

Is your business current, or does your technology have you stuck in the past?

INTRODUCTION

For most businesses, planning for the upcoming quarter is well underway. As you're determining your year-over-year progress and identifying new areas for improvement and growth, an area that cannot be ignored is your technology infrastructure. Especially considering the rapid digital transformation that's becoming common in our society.

Did you know that consumer and business digital adoption fast-forwarded by an astonishing five years¹ during just the first eight weeks of lockdown?

This rapid transformation, unfortunately, means that unless your technology is refreshed on a 6-12-month lifecycle, it's likely that you are operating on at least one outmoded solution.

REASONS DRIVING RAPID DIGITAL TRANSFORMATION IN BUSINESS:

Growth Opportunities

NOT ALL TECHNOLOGY IS CREATED EQUAL

Emerging technology is the gold standard for agile businesses. In fact, companies that utilize emerging technologies have increased their annual revenue by 58%.* Examples of popularly adopted emerging technologies include cloud-native platforms, AI-based cybersecurity, and decision intelligence. But which technologies are best for your team? **To start, identify your primary business goals.**

ASK YOURSELF:

1. Am I looking to optimize or transform our technology?
2. What area(s) of our infrastructure holds our team back from success?
3. Who do I need to involve in order to implement these goals?

OPTIMIZE OR TRANSFORM – UNDERSTANDING YOUR GOALS

Whether you're looking to transform your technology infrastructure or optimize what you already have, emerging technologies have made product offerings more secure, all-encompassing, and accessible to businesses of all sizes and industries. These digital tools help businesses accelerate progress toward goals such as financial returns, workforce diversity, and environmental targets by 22%¹.

3 out of 4 companies that have implemented AI fully experienced an improvement in their decision-making².

TECHNOLOGY DEFICITS - IDENTIFYING AREAS THAT HOLD YOUR TEAM BACK

Common areas in which businesses explore technology optimization and transformation include operational, productivity, and security systems. With **2.5 quintillion bytes** of data generated daily¹, businesses are generating intense demand for automated tools that can bear the weight of this load.

Companies that choose to employ emerging innovations grow their annual net income **80%² more** than their competition who does not.

IMPROVING OPERATIONS - CHECK ALL THAT APPLY

☐

Do you feel your technology enhances your ability to make data-driven decisions?

☐

Do you feel your technology provides added value for both your clients and employees?

☐

Do you feel your executive team is empowered with key insights into their roles?

☐

Do you feel your business is agile in adapting to new trends in your industry?

☐

Do you feel your technology helps to increase your profit margins?

☐

Do you feel your technology is scalable and replicable?

ORGANIZATIONS THAT ARE DATA-DRIVEN ARE:

23x

more likely to convert leads

6x

more likely to retain leads

19x

more likely to improve their ROI

IMPLEMENTATION - IDENTIFYING AREAS THAT HOLD YOUR TEAM BACK

Now that you've explored areas of improvement, you can begin to involve key decision-makers and contractors to bring your goals to life. Our team strongly recommends consulting a technology expert any time you are making decisions regarding your IT infrastructure.

COST - To help you understand exactly what products and solutions will keep you within budget while providing the functions you desire.

VALUE - To not purchase excess items or products that will not serve your overarching goals.

INTEGRATION - To get your system hardwired, implemented, and ready to launch.

TRANSITION - To train your employees in how to utilize their new solutions and update processes to reflect utilizing these tools.

MAINTENANCE - To ensure your solutions remain optimized, secure, and functional.

CONCLUSION

Business technology is poised to enhance operations, improve decision-making, increase accuracy, and provide numerous other benefits thanks to emerging technologies. To discover which emerging tech is the next best solution for your business, contact our team. We're offering in-depth technology assessments for business owners and decision-makers to help them gauge where they're at, where they're going, and how to get there.
